Contents Volume 36 (March 1987)

Special Issue: Selected Papers presented at the Fifth International Symposium on Synthetic Membranes in Science and Industry, Tübingen, Federal Republic of Germany, September 2–5, 1986

Guest Editorial 3

The focussing of membrane R&D on areas of commercial potential
H. Riedinger and W. Faul (Jülich, F.R.G.) 5

Quantitative microscopic study of surface characteristics of track-etched membranes
F. Martínez-Villa, J.I. Arribas and F. Tejerina (Valladolid, Spain) 19

Effects of structure and charge on the diffusive salt permeation across microporous membrane filters
F. Martínez-Villa, L. Martinez, J.I. Arribas and F. Tejerina (Valladolid, Spain) 31

Streaming potential and phenomenological coefficients in Nuclepore membranes
J.A. Ibañez, J. Forte, A. Hernandez and F. Tejerina (Murcia, Spain) 45

Separation of protein mixtures by BIORAN® porous glass membranes
R. Schnabel, P. Langer and S. Breitenbach (Mainz, F.R.G.) 55

Microfabrication of membranes with extreme porosity and uniform pore size
W. Ehrfeld (Karlsruhe, F.R.G.) R. Einhaus (Essen, F.R.G.), D. Münchmeyer (Karlsruhe, F.R.G.) and H. Strathmann (Stuttgart, F.R.G.) 67

Production and characterization of homogeneous porous polymer films
W. Heinzelmann, M. Toscan (Seewen-Schwyz, Switzerland), A. Ruf and D. Christen (Zürich, Switzerland) 79

Dynamic filtration of microbial suspensions using an axially rotating filter
K.H. Kroner and V. Nissinen (Braunschweig, F.R.G.) 85

Membrane plasma protein fractionation for low-density lipoprotein apheresis: Comparison of two hollow fiber modules and two filtration systems
F. Kochinke and H. von Baeyer (Berlin, Germany) 101

Thermodynamic analysis of a membrane-forming system water/*N*-methyl-2-pyrrolidone/polyethersulfone
L. Zeman and G. Tkacik (Bedford, MA, U.S.A.) 119

Chemical characterization of ultrafiltration membranes by spectroscopic techniques
M. Fontyn, B.H. Bijsterbosch and K. van 't Riet (Wageningen, The Netherlands) 141

Fouling of an ultrafiltration membrane by a dissolved whey protein concentrate and some whey proteins
J.L. Nilsson (Lund, Sweden) 147

A fundamental study of the ultrafiltration of oil–water emulsions
P. Lipp, C.H. Lee, A.G. Fane and C.J.D. Fell (Kensington, N.S.W., Australia) 161

Isoporous ultrafiltration membranes from bacterial cell envelope layers
M. Sára, C. Manigley, G. Wolf and U.B. Sleytr (Wien, Austria) 179

Poly(vinyl chloride) ultrafiltration membranes modified by high frequency discharge treatment
F. Vigo, M. Nicchia and C. Uliana (Genoa, Italy) 187

Computer simulation of ultrafiltration processes
J.S. Żuk (Rzeszów, Poland) 201

Tailoring of ultrafiltration membranes by plasma treatment and their application for the desalination and concentration of water-soluble organic substances
J. Wolff (Leverkusen, F.R.G.), H. Steinhauser and G. Ellinghorst (Köln, F.R.G.) 207

Computer simulation of ultrafiltration processes
J.S. Żuk (Rzeszów, Poland) 201

Tailoring of ultrafiltration membranes by plasma treatment and their application for the desalination and concentration of water-soluble organic substances
J. Wolff (Leverkusen, F.R.G.), H. Steinhauser and G. Ellinghorst (Köln, F.R.G.) 207

Surface reactions on blood contact during haemodialysis and haemofiltration with various membrane types
H. von Baeyer, A. Lajous-Petter, W. Debrandt, H. Hampl, F. Kochinke and R. Herbst (Berlin, Germany) 215
Ultrafiltration of macromolecular solutions and cross-flow microfiltration of colloidal suspensions. A contribution to permeate flux calculations
R. Rautenbach (Aachen, F.R.G.) and G. Schock (Baden-Dättwil, Switzerland) 231
Novel polymer/liquid crystal composite membrane with unique permselective characteristics
T. Kajiyama, H. Kikuchi and S. Shinkai (Fukuoka, Japan) 243
Preparation of asymmetric microfiltration membranes and modification of their properties by chemical treatment
F.F. Stengaard (Nakskov, Denmark) 257
Photosynthetic membranes. VI. Characterization of ultrafiltration membranes prepared by photografting zeolite–epoxy–diacrylate resin composites onto cellulose
M. Zeni, I.R. Bellobono, F. Muffato, A. Polissi, E. Selli and E. Rastelli (Milan, Italy) 277
Water and salt transport through two types of polyamide composite membranes
P. Eriksson (Minneapolis, MN, U.S.A.) 297
Selection of polymers for pervaporation membranes
C.-M. Bell, F.J. Gerner and H. Strathmann (Stuttgart, F.R.G.) 315
Recovery and concentration of high vapour pressure bioproducts by means of controlled membrane separation
W. Gudernatsch, K. Kimmerle, N. Stroh and H. Chmiel (Stuttgart, F.R.G.) 331
Liquid separation with fluorinated polymer membranes
M. Nakamura, S. Samejima and T. Kawasaki (Tokyo, Japan) 343
Separation of ethanol from ethanol/water mixtures by plasma-polymerized membranes from silicone compounds
T. Kashiwagi, K. Okabe and K. Okita (Tokyo, Japan) 353
Removal of organic vapors from air by selective membrane permeation
H. Paul, C. Philipsen, F.J. Gerner and H. Strathmann (Stuttgart, F.R.G.) 363
Pervaporation: Importance of concentration polarization in the extraction of trace organics from water
R. Psaume, Ph. Aptel, Y. Aurelle, J.C. Mora (Toulouse, France) and J.L. Bersillon (Le Pecq, France) 373
Radiation-grafted membranes for pervaporation of ethanol/water mixtures
A. Niemöller, H. Scholz, B. Götz and G. Ellinghorst (Köln, F.R.G.) 385
A new work diagram suitable for pervaporation and gas separation under cross flow
K. Hattenbach (Geesthacht, F.R.G.) 405
Mass transfer in a permeation column
H.J. Bart, R. Wachter, R. Marr and H.J. Müller (Graz, Austria) 413
Modeling of liquid membrane separation processes
R. Rautenbach and O. Machhammer (Aachen, F.R.G.) 425
Investigation of mass transport in asymmetric pervaporation membranes
R. Rautenbach, C. Herion, M. Franke, A.-F.A. Asfour, A. Bemquerer-Costa and E. Bo (Aachen, F.R.G.) 445
Design and operation of a pervaporation plant for ethanol dehydration
U. Sander and P. Soukup (Frankfurt/Main, F.R.G.) 463
Solvent recovery from air
K. Kimmerle (Stuttgart, F.R.G.), C.M. Bell (Menlo Park, CA, U.S.A.), W. Gudernatsch and H. Chmiel (Stuttgart, F.R.G.) 477

Application of electrodialysis in the production of malic acid
S. Sridhar (Marl, F.R.G.) 489
Film control and membrane control in charged membranes
S. Mafé, V.M. Aguilella and J. Pellicer (Valencia, Spain) 497
A polymeric electrode for ionic surfactants
C.J. Davidson, P. Meares (Old Aberdeen, Great Britain) and D.G. Hall (Manchester, Great Britain) 511
Membrane reactor in fatty acid production
R. Molinari, E. Drioli and G. Barbieri (Arcavacata di Rende, Italy) 525
Anion exchange membranes consisting of poly (vinylpyridine) and poly (vinylbenzyl chloride) for Cr/Fe redox batteries
A. Reiner and K. Ledjeff (Freiburg, F.R.G.) 535
The bio-artificial endocrine pancreas: Modelling and performance evaluation
S. Di Giulio, C. Fabiani, G. Giubileo and V. Violante (Rome, Italy) 541
Meetings Calendar 553
Author Index Volume 36 (1988) 555
